

## Study W/ Me

A study app and calendar for the busy student.

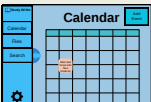

The welcome page for our study app. Clicking on the GO button will load all previously saved files, and take the user to the Calendar page.

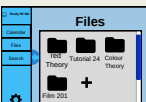

Clicking on the Add Event button, top right side of the page will take the user to the Add Event page.

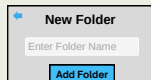

Users can add either one-time or recurring events and set a specific time and date for these events. Only one event can be added at a time, and the user can go back at any time.

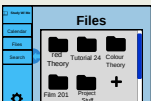

The new one-time event has been saved to the Calendar page at the appropriate time and date. The Search button on the left menu takes the user to the Search page.

The Files page displays all previously created files and their contents. The user can add a new file using the Plus button.

The user can create a new folder by typing in a name for the folder and clicking the Add Folder button. The user can press the left arrow at the top left hand corner to go back at any time.

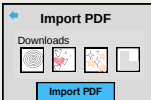

A new file has been created and added to the view. Opening a pre-existing folder allows the user to access all pre-existing notes, flashcards, and lectures.

The user can access pre-existing materials and import new lecture notes as PDFs using the Import PDF button. These PDFs cannot be modified. The user can go back using the left arrow button.

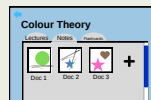

The user can import a PDF by searching their device and clicking the Import PDF button. The user can use the left arrow at the top left hand corner to go back at any time.

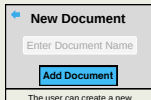

Users can only import PDFs, they cannot import folders or other formats of documents. The user can use the left arrow at the top left hand corner to go back at any time.

A new PDF has been imported and added to the view. Opening a pre-existing document allows the user to access all pre-existing notes.

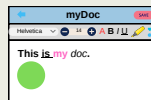

The user can access pre-existing notes and create new notes using the Plus button. These documents can be modified. The user can go back using the left arrow button.

The user can create a new document by typing in a name for the document and clicking the Add Document button. The user can press the left arrow at the top left hand corner to go back at any time.

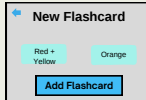

A new document has been created and added to the view. Opening a pre-existing document allows the user to access all pre-existing notes.

A pre-existing document can be modified and saved using the Save button at the top right. The user can go back using the left arrow button at any time.

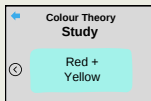

The user can view pre-existing flashcards and create new flashcards with the Plus button. Users can also Study the flashcards using the Study button by viewing one card, one side at a time.

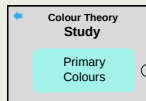

The Plus button generates a new pair of flashcards that the user can fill in and add to their set using the Add Flashcards button.

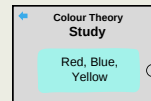

A new pair of flashcards has been created and added to the view. The Study button takes the user to the Study page.

Study mode presents the flashcards to the user one at a time. The user can go to the previous card in the set using the previous button.

The user can view the other side of the card by clicking it.

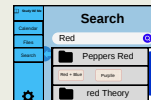

The user can press the blue left arrow at the top left-hand corner to go back at any time to the Flashcards page.

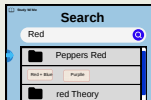

The user can press the left arrow at the top left hand corner to go back at any time to the Files page.

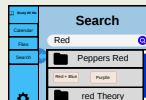

The Cog button at the bottom of the left menu takes the user to the Settings page.

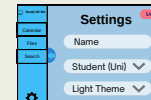

Users can look up all notes, files, and flashcards relating to their search term. The side menu can be collapsed, by clicking on the left arrow button.

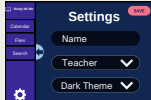

Collapsing the side menu makes the main interface easier to navigate. The side menu can be expanded, by clicking on the right arrow button.

Expanding the side menu decreases the size of the main interface. The Files button on the left menu takes the user to the Files page.

The user can enter their name into the textbox provided and change their status from Student (Uni) to Student (Highschool), Teacher, Trainee, or Individual Learner.

The dropdown menu to Light Theme will allow the user to choose between light mode and dark mode. All changes can be saved using the SAVE button.
